

One Identity Manager and ServiceNow Integration 9.1.3

Release Notes

13 May 2024, 11:31

These release notes provide information about the One Identity Manager and ServiceNow Catalog Integration release.

About this release

This release provides integration of One Identity Manager with IT Service Management solution, ServiceNow. One Identity Manager's IT Shop services can be requested from self-service portal in ServiceNow.

Supported platforms

SCN Module with ServiceNow Service Catalog integration is available on One Identity Manager 9.1.3.

New features

New features from the integration of One Identity Manager and ServiceNow:

- SCN app now supports Vancouver version of ServiceNow.
- The ServiceNow Request Approval workflow is enhanced to close the request only after an action for the request (raised in One Identity Manager) has been performed on One Identity Manager. In case no action for the request has been taken in One Identity Manager within the specified duration, the request is automatically aborted in One Identity Manager and closed in ServiceNow.
- Employees are fetched according to their User Type from OneIM to ServiceNow using the configuration parameter "employee_type".
- By default, all type of employees are synced from One Identity Manager to ServiceNow. Optionally, the type of Employees to be synced from One Identity Manager to ServiceNow can now be specified in the configuration parameter "Employee_Type" in ServiceNow.
- Minimum number of characters needed for searching the service items and service category in ServiceNow Portal Page can be configured in the Configuration Parameter "minimum_input_length_for_service_category" and "minimum_input_length_for_service_item" in ServiceNow.
- A service item's validity time(Valid From and Valid Until) entered in the service portal page will be in servicenow user's preferred timezone. The time is converted into GMT format before raising the request in One Identity Manager.
- New Employees for One Identity manager can be created from ServiceNow using the Person onboarding form from the service portal.

Known issues

The following is a list of issues, including those attributed to third-party products, known to exist at the time of release.

- Only Simple service items can be requested from Self Service Portal in ServiceNow.

Module Requirements

Below are the prerequisites for the new features that provides an integration between One Identity Manager and self-service portal in ServiceNow: -

- SCN Module.
- One Identity Manager Application server.
- One Identity Manager for Service Catalog Application should be installed in ServiceNow.

System Requirements

Before installing One Identity Manager, ensure that your system meets the following minimum hardware and software requirements.

The system requirements applicable to the One Identity Manager apply to One Identity Manager and ServiceNow Integration also. For more information see [One Identity Manager Release Notes](#).
