# SQL PI Repository Schema

Welcome to the *Foglight for Oracle SQL PI Schema Reference Guide*.

This guide provides conceptual information and instructions on how to query the SQL PI repository.

For more information, see the following topics:

- [About the SQL PI repository](#)
- [Connecting to the SQL PI repository](#)
- [Collected Metrics](#)
- [Table Data dictionary](#)

## About the SQL PI repository

SQL PI allows you see enterprise-level performance at a glance. You can determine the root-cause of performance deviations and identify changes to your SQL Server environment quickly and easily. The repository allows to save historical data for up to three years and to be able to see the changes over the time.

## Connecting to the SQL PI repository

SQL PI repository is based on a PostgreSQL® database (<http://www.postgresql.org>). Any Postgres database administration and development utility, such as pgAdmin (<http://www.pgadmin.org>), is sufficient to connect to the repository. In order to connect to the repository, you need the following information:

- Repository host— determined during the initial installation, could be on the Foglight Management Server host.
- Repository port— default port **5029**
- Repository database — **spioracle**
- Connection user and password — **postgres/postgres**

Your agent repository configuration can be found under the menu **Administration > Agents > Agent Status > (agent\_name) > Edit Properties**. In the list of properties, search for the SQL PI properties:

- SQL PI Repository host name
- SQL PI Repository port
- SQL PI Repository database

The default user and password is **postgres**.

## Collected Metrics

For detailed information, see the following topics:

- General Tables
- Performance Metric (Fact) Tables
- Dimension Tables
- Change Tracking Data

## General Tables

General information related to the repository is stored in:

**pa\_repository** - Repository Schema information

**spiora\_instance\_dim** - All monitored instances in the repository

**spiora\_general\_config** - Configuration used in the SPI engine per monitored instance

## Performance Metric (Fact) Tables

The Fact tables hold the OLAP cube of the monitored instance performance data.

There are several categories that define the data that a Fact table holds, and as result the table name:

- Aggregation Level. The resolution to which the collected data is grouped.

**Table 1. Aggregation level**

Level	Description	Name
Instance	The entire monitored instance level	spiora_instance_..._fact_...
Unique Combination	Top n unique combinations of dimensions that assemble the cube.	spiora_unique_..._fact_...
Session	A more detailed grouping of the unique combinations with additional identifiers of the running session.	spiora_session_lock_fact_...

- Data Type. The type of performance metrics saved in the table.

**Table 2. Data Type**

Type	Name
Performance metrics	spiora_{level}_stat_fact_...
Wait events	spiora_{level}_wevent_fact_...
Lock events	spiora_{level}_lock_fact_...
Object I/O	spiora_{level}_object_io_fact_...
File I/O	spiora_{level}_file_io_fact_...

- Retention. The granularity of the data and the period for which it is saved (age), as derived from the retention policy.

**Table 3. Retention**

Granularity	Age	Name
1 minute	6 hours	spiora_{level}_{type}_fact_1m_<YYYYMMDDHH>00 <b>NOTE:</b> The tables in the 1m granularity level are partitioned, meaning a whole old table is dropped instead of deleting data in the table.
15 minutes	3 days	spiora_{level}_{type}_fact_15m
1 hour	2 weeks	spiora_{level}_{type}_fact_1h

**Table 3. Retention**

<b>Granularity</b>	<b>Age</b>	<b>Name</b>
6 hours	30 days	spiora_{level}_{type}_fact_6h
1 day	90 days	spiora_{level}_{type}_fact_1d
1 week	2 years	spiora_{level}_{type}_fact_1w

The suffix of the table indicates the starting time of the data in the table (GMT times), aligned to 6 hours (the age):

- <YYYYMMDD>0000 (between 00-06)
- <YYYYMMDD>0600 (between 06-12)
- <YYYYMMDD>1200 (between 12-18)
- <YYYYMMDD>1800 (between 18-24)

## Dimension Tables

The Dimension tables hold additional information to explain some of the dimensions in the Fact tables, which their values are in the form of IDs.

**Table 4. Dimension tables**

<b>Dimension</b>	<b>Description</b>	<b>Name</b>
Syntax	Holds the text of the sql which matches the SQL ID in the syntax column in the Fact tables	spiora_syntax_dim_{suffix}
Plan	Holds the rows that assemble the plan that matches SQLs stored in the Fact table. These are identified both by SQL ID and by plan hash.	spiora_planm_dim_{suffix}

The suffix of the tables defines the granularity of the data stored in it:

- 1 \_1m\_<YYYYMMDDHH>00 - holds data for 6 hours.
- 2 Empty - holds data permanently.

## Change Tracking Data

For detailed information, see the following topics:

- [Change Tracking Items](#)
- [Change Tracking Snapshots Tables](#)

## Change Tracking Items

This table contains the record of changes per type over time:

- spiora\_change\_tracking\_item

## Change Tracking Snapshots Tables

These tables hold the latest state of a specific type of data, to be compared in each cycle to the state in the monitored instance and identify changes.

**Table 5. Change Tracking Snapshots Tables**

Type	Description	Name
Data files	The data files in the monitored instance.	spiora_ct_data_file_state
Disks	The disks in the monitored instance.	spiora_ct_disks_state
Instance properties	The properties of the monitored instance.	spiora_ct_instance_properties_state
Network interface	The network interfaces of the monitored instance system (Windows®).	spiora_ct_network_interface_state
Parameters	The parameters of the monitored instance system.	spiora_ct_parameters_state
Redo logs	The redo logs in the monitored instance.	spiora_ct_redo_log_state
Resources	The resource of the monitored instance system.	spiora_ct_resources_state
Swap space allocation	The space allocation in the monitored instance system (Windows).	spiora_ct_resources_state
User	The active users of the monitored instance.	spiora_ct_user_state

# About us

---

## We are more than just a name

We are on a quest to make your information technology work harder for you. That is why we build community-driven software solutions that help you spend less time on IT administration and more time on business innovation. We help you modernize your data center, get you to the cloud quicker and provide the expertise, security and accessibility you need to grow your data-driven business. Combined with Quest's invitation to the global community to be a part of its innovation, and our firm commitment to ensuring customer satisfaction, we continue to deliver solutions that have a real impact on our customers today and leave a legacy we are proud of. We are challenging the status quo by transforming into a new software company. And as your partner, we work tirelessly to make sure your information technology is designed for you and by you. This is our mission, and we are in this together. Welcome to a new Quest. You are invited to Join the Innovation™.

## Our brand, our vision. Together.

Our logo reflects our story: innovation, community and support. An important part of this story begins with the letter Q. It is a perfect circle, representing our commitment to technological precision and strength. The space in the Q itself symbolizes our need to add the missing piece—you—to the community, to the new Quest.

## Contacting Quest

For sales or other inquiries, visit [www.quest.com/contact](http://www.quest.com/contact).

## Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request.
- View Knowledge Base articles.
- Sign up for product notifications.
- Download software and technical documentation.
- View how-to-videos.
- Engage in community discussions.
- Chat with support engineers online.
- View services to assist you with your product.
