

Quest® Security Explorer® 9.8.1

What's New

March 2019

Quest® Security Explorer® provides a single console for managing access controls, permissions and security across Microsoft® platforms that span multiple servers. The product provides a broad array of security enhancements including the ability to identify who has rights to resources across the entire organization. It also provides the ability to grant, revoke, clone, modify and overwrite permissions quickly and from a central location.

Unlike native tools, Security Explorer provides the ability to back up and restore permissions only, ensuring the integrity of data. To help meet auditing requirements, Security Explorer provides convenient reports that can be pulled on the fly. Lastly, the product's cleanup capabilities address common post-migration security issues.

This document highlights key features new in this release. For more information about these or any features, see the Security Explorer 9.8.1 Installation and User Guides.

- [Additional supported platforms](#)
- [General product enhancements](#)
- [SharePoint Security enhancements](#)

Additional supported platforms

- Windows Server® 2019
- Exchange 2019
- SQL Server® 2019
- SharePoint® 2019
- NetApp Clusters 9.3 and 9.4

General product enhancements

- When adding licensed servers, Security Explorer will not allow you to add more servers beyond the number of available servers with your license.

SharePoint Security enhancements

- When selecting to remove permissions on disabled accounts from Active Directory groups, Security Explorer will remove only those disabled accounts that were added to SharePoint from their Active Directory groups.

NOTE: The currently logged on user must have the Read Members and Write Members permissions applied to the Descendant Group on the target domains.

About us

Quest provides software solutions for the rapidly-changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid datacenters, security threats, and regulatory requirements. We are a global provider to 130,000 companies across 100 countries, including 95% of the Fortune 500 and 90% of the Global 1000. Since 1987, we have built a portfolio of solutions that now includes database management, data protection, identity and access management, Microsoft platform management, and unified endpoint management. With Quest, organizations spend less time on IT administration and more time on business innovation. For more information, visit www.quest.com.

Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request.
- View Knowledge Base articles.
- Sign up for product notifications.
- Download software and technical documentation.
- View how-to-videos.
- Engage in community discussions.
- Chat with support engineers online.
- View services to assist you with your product.
