ANALYTIX DATA SERVICES

BUSINESS USER PORTAL

Installation Instructions

Prerequisites

1. The BUP needs to be installed on the same tomcat server where the Mapping Manager application is installed.

2. Copy the following file (in bold below) from your existing Mapping Manager installation
    Iccdocuments.properties - *<tomcat_location>\webapps\MappingManager\WEB-INF\configuration\properties*

Steps to Install the Business User Portal Application

1. Download the software file and extract the file.
2. Go into the *war* folder and copy the **BUP.war** file.
3. go into tomcat/webapps folder and paste the BUP.war file
4. after a minute or two, you will see a BUP folder
5. **Updating the "database.properties" file**
    Go into the folder ***<tomcat_location>\webapps\MappingManager\WEB-INF\database*** and update the "*database.properties*" file to point to the same SQL Server database being used by the Mapping Manager application
6. **Updating the "iccdocuments.properties" file**
    Go into the folder ***<tomcat_location>\webapps\MappingManager\WEB-INF\configuration\properties*** and replace the existing "*iccdocuments.properties*" file in this folder with the "*iccdocuments.properties*" file from the Mapping Manager application (copied in the prerequisites section)
7. Restart the Tomcat server
8. Login to the Business User Portal using the URL http://server_name:Port#/BUP/
