

QoreStor Administration: Module 6 - OST - Free

Description:

This course teaches how to create OST containers and attach QoreStor to Veritas' Backup Exec and NetBackup products, as well as covering some general best practices.

Training Delivery Modality:

This course is offered as self-paced web-based training with simulated lab exercises.

Intended Audience:

QoreStor users and administrators (Customers, Partners, and Employees).

Prerequisites:

The following prerequisites are recommended for this course or relevant knowledge/experience:

- Basic understanding of networking and storage concepts
- Intermediate knowledge of Linux
- Module 1: Product Overview
- Module 2: Installation and Implementation
- Module 3: Users, Storage Groups and Containers
- Module 4: Management

Duration:

Approximately 20-30 minutes with simulation.

Course Objectives:

This course has the following objectives:

- Creating OST containers
- Installing OST plugin
- Attaching QoreStor to Backup Exec
- Attaching QoreStor to NetBackup

Student Lab Experience:

For a practical lab experience during this course, students will utilize simulated lab environments. The lab exercises provided in this course include:

- Create an OST container
- Attach QoreStor instance to Backup Exec
