

Toad for Oracle Developers - Version Control and Code Reviews

Description

This self-paced, web-based training course is available for FREE to all Toad World registered users. This course is based on Toad for Oracle 12.5 or later. If you have an older release of Toad for Oracle, please visit our Support portal to upgrade. If you have any questions, please contact your local Sales Representative for further details at sales@quest.com

This course is for Oracle developers who need to learn how to best leverage Toad's version control and code review features.

Intended Audience: Oracle developers who write code that needs to be stored and tracked using version control and also perform code reviews in order to comply with coding standards

Learning Objectives

This course will cover how to:

- Configure Toad to work with 3rd party version control software
- Use Team Coding to check-in and check-out code from the version control system
- Use Code Analysis to simplify and automate code reviews

Training Delivery & Duration

Students complete this course through self-paced web-based training. The course presents product functionality and provides the participant the opportunity for hands-on practice resolving real-world problems through use case driven simulations. Each lesson contains closing questions allowing for a knowledge check. The lessons in the course build on each other and each new lesson allows the participant the opportunity to reinforce what they have learned in previous lessons. There is a test that correlates to the course. Upon passing this test, the participant has the opportunity to achieve a Toad for Oracle Developers - Version Control and Code Reviews Certificate of Completion.

Duration: Approximately 2-4 hours.

Topics

Introduction -

- Overview of Team Coding, version control system integration features and an introduction to Code Analysis
- Navigating the course

Lesson 1 –

- Install, Configure and understand Team Coding
- Use Team Coding to interact with your version control system (VCS)
- Map VCS projects to Team Coding

Lesson 2 –

- Introduction to Code Analysis
- Build and share project specific Rule Sets
- Publish and share Code Analysis results data and Rule sets to a Toad Intelligence Central server

Prerequisites and assumptions

- A working knowledge of Toad for Oracle, or the completion of the Toad for Oracle Fundamentals course is recommended.
- An understanding of Oracle database application development.
